

SAFETY ALERT

Compatible mounting systems for Bobike Seats

Bobike bicycle safety seats

Mounting System Compatibility Chart

Bobike team has observed challenges among its customers in comprehending the mounting systems of each seat and determining when changes are permissible between different systems - for luggage or for frame.

To prevent accidents or inappropriate modifications to Bobike seats, we have created a set of charts categorized by range to facilitate the transmission of this information.

Exclusive® Maxi & Tour

The Bobike Exclusive Maxi & Tour bike seats offer the flexibility of buying spare parts and switching mounting systems based on your needs.

You can easily convert your original seat into a frame or carrier model with the right spare parts.

The Carrier Mount version, tailored for bikes with luggage carriers, features the EASY Mount System. This is especially handy when transferring the seat between bikes, because you don't need tools.

The Frame version directly attaches to the mounting bar for a lighter seat.
